Fastest Machine Changeover in the Industry

Understanding your need for a strong bottom line and achieving this thru production. But let's face it, if your line is not running, you are not making money. This is why our changeovers are the fastest in the industry.

Spare Sense

Reasonable spare parts pricing that treats you like a valued customer. We do not believe in taking advantage of a situation. Having a long-term customer relationship is more important.

Support

Modern offers free lifetime phone support and has an on-site service technical staff that is second to none. Remote tech support and troubleshooting capabilities.

High Speed Thru-Put

Modern equipment is designed to provide the highest run speeds with minimal scrap rates. Our pouching line is capable of meeting or exceeding any competitive offering available.

Technology

Modern offers the latest technology from our robust mechanical engineering to our state-of-the-art servo control systems, making our machines your profit center.

Compatibility

All Modern stand-up pouch lines are digital print compatible and recycle pouch ready.

Ease of Operation

Modern equipment lines are designed with the operator in mind. Our equipment has gained a reputation throughout the industry as being the most operator friendly and easy to use.

Warranty

A full 2-year warranty!
