“I first came into contact with PFFC in 1989 when I began providing PR services to Graphic Packaging Corporation, at that time part of the Adolph Coors Company. Nine years later, I launched my own agency, focusing on packaging and converting companies, and was fortunate to keep in contact with the PFFC editorial staff. Over the past 20+ years, I have sent the publication countless news items, and found that each news release I submitted would ALWAYS be weighed solely on the basis of its relevance to the PFFC readership. The entire professional staff possess a commitment to editorial integrity that is simply unlimited.”

WEBSITE/ONLINE SOLUTIONS (INCREASING SPEND FOR MARKETERS)

Laser Focused Online/Impression Based Advertising

Reach potential and existing customers through laser-focused digital advertising. Let us help drive traffic to your booth where you exhibit or with Top Prospects. We can deliver your ads to users based on their online activities and habits. Targeted Digital Marketing is an impression-based advertising campaign that deploys digital ads through any combination of:

GeoFencing - What we do is basically draw a digital "fence" around an area we would want to target. Imagine the entire building where you are exhibiting or a small, more intimate conference anywhere in the world. We begin targeting their mobile device and once they open one of the over 600,000 Applications and Websites we have agreements with, we will then deliver your specific message to their device. This can be a Cell Phone, Laptop or Tablet. We can geo-fence any trade show, convention, YOUR TOP PROSPECTS, association meeting or even a competitor's location.

We can Geofence any trade show, conference, prospect(s) or competitor

Event Targeting - Re-target prospects that were captured during a specified event for up to 30 days following the event.

Keyword Targeting - There is no limit to keywords. We just want to plan out your keywords correctly, then it will work for those in the area that are looking for you offer. Unlike Pay Per Click, we set a keyword and they don't even have to go to your website, the program begins targeting them and will deliver your ads to them simply because they did a keyword search.

Website Re-Targeting - Basically, anyone that comes to your website, we can begin immediately following them around the internet and delivering a special message to the user to drive them back to your site and this increases conversions. This is a VERY important tool for anyone that has a website nowadays!

Site Re-Targeting - Site re-targeting is marketing to those who have been to your website. This is the most common type of re-targeting.

Contextual Targeting - Contextual targeting allows you to target your ideal consumer based on habitual tendencies.
